

Module 9: Inheritance Genetics - Learning Questions

1. How are genes and alleles related?
2. How do genotype and phenotype differ?
3. What does heterozygous mean?
4. How does allele segregation explain a monohybrid cross?
5. What does a Punnett square predict?
6. Why are probabilities not guarantees?
7. How do incomplete dominance and codominance differ?
8. Why are many traits polygenic?
9. How can environment influence phenotype?
10. What evidence in a pedigree suggests recessive inheritance?
