

Module 5: Membranes - Learning Questions

1. Why do phospholipids form bilayers in water?
2. What does selective permeability mean?
3. How does diffusion depend on concentration gradients?
4. How is osmosis different from general diffusion?
5. When does transport require a protein channel?
6. Why does active transport require energy?
7. What happens to an animal cell in a hypertonic solution?
8. How do hypotonic and isotonic conditions differ?
9. How can membrane structure affect cell survival?
10. What evidence would show water moved across a membrane?
