

# **Course Schedule - BIOL-1: General Biology**

## **Fall 2026**

Schedule for BIOL-1 section **C1000** at the D Yard Education room. Required meetings are Tuesdays and Thursdays, 5:30–8:40 PM. The first class meeting is August 25. The planned section final examination is December 10; December 15 is reserved for feedback and post-final discussions.

| Session | Week | Day | Date | Topic                                        | Recommended textbook chapters | Notes                                                                    |
|---------|------|-----|------|----------------------------------------------|-------------------------------|--------------------------------------------------------------------------|
| 1       | 1    | Tue | 8/25 | Module 1: Biology - The Study of Life; Lab 1 | Ch. 1                         | First class meeting                                                      |
| 2       | 1    | Thu | 8/27 | Module 2: Basic Chemistry; Lab 2             | Ch. 2                         |                                                                          |
| 3       | 2    | Tue | 9/1  | Module 3: Organic Molecules; Lab 3           | Ch. 3                         |                                                                          |
| 4       | 2    | Thu | 9/3  | Module 4: Cells; Lab 4                       | Ch. 4                         |                                                                          |
| 5       | 3    | Tue | 9/8  | Module 5: Membranes; Lab 5                   | Ch. 5                         |                                                                          |
| 6       | 3    | Thu | 9/10 | Module 6: Metabolism; Lab 6                  | Chs. 6–8                      |                                                                          |
| 7       | 4    | Tue | 9/15 | Practice Tests 01–02; Exam 01 review         | Chs. 1–8                      | Practice Test 01 covers Modules 1–4; Practice Test 02 covers Modules 5–6 |
| 8       | 4    | Thu | 9/17 | <b>Exam 01</b><br>(Modules 1–6)              | Chs. 1–8                      | Exam                                                                     |
| 9       | 5    | Tue | 9/22 | Module 07: Molecular Genetics; Lab 07        | Ch. 12                        |                                                                          |

| Session | Week | Day | Date  | Topic                                                | Recommended textbook chapters | Notes                                      |
|---------|------|-----|-------|------------------------------------------------------|-------------------------------|--------------------------------------------|
| 10      | 5    | Thu | 9/24  | Module 08:<br>Cellular Genetics;<br>Lab 08           | Chs. 9–10                     |                                            |
| 11      | 6    | Tue | 9/29  | Module 09:<br>Inheritance<br>Genetics; Lab 09        | Ch. 11                        |                                            |
| 12      | 6    | Thu | 10/1  | Module 10:<br>Epigenetics; Lab<br>10                 | Ch. 13                        |                                            |
| 13      | 7    | Tue | 10/6  | Module 11:<br>Genomics &<br>Biotechnology;<br>Lab 11 | Ch. 14                        |                                            |
| 14      | 7    | Thu | 10/8  | Practice Test 03;<br>Exam 02 review                  | Chs. 9–14                     | Practice Test<br>03 covers<br>Modules 7–11 |
| 15      | 8    | Tue | 10/13 | <b>Exam 02</b><br>(Modules 7–11)                     | Chs. 9–14                     | Exam                                       |
| 16      | 8    | Thu | 10/15 | Module 12:<br>Darwin and<br>Evolution; Lab 12        | Ch. 15                        | Start of<br>evolution/<br>ecology unit     |
| 17      | 9    | Tue | 10/20 | Module 13: How<br>Populations<br>Evolve; Lab 13      | Ch. 16                        |                                            |

| Session | Week | Day | Date  | Topic                                                      | Recommended textbook chapters   | Notes                                                                  |
|---------|------|-----|-------|------------------------------------------------------------|---------------------------------|------------------------------------------------------------------------|
| 18      | 9    | Thu | 10/22 | Module 14:<br>Macroevolution;<br>Lab 14                    | Chs. 17, 19                     |                                                                        |
| 19      | 10   | Tue | 10/27 | Module 15:<br>Population and<br>Systems Ecology;<br>Lab 15 | Chs. 44–45                      |                                                                        |
| 20      | 10   | Thu | 10/29 | Module 16:<br>Capstone Systems<br>Synthesis; Lab 16        | Cumulative Chs.<br>1–17, 44–45  | Integrative<br>capstone                                                |
| 21      | 11   | Tue | 11/3  | Practice Test 04;<br>Exam 03 review                        | Chs. 15–17, 19,<br>44–45        | Practice Test<br>04 covers<br>Modules 12–16                            |

|         |      |     |       |                                                   |                               | planning record                                               |
| 25      | 13   | Tue | 11/17 | <b>Lab 19 (TBD)</b>                               | TBD;<br>cumulative reference  | Topic and materials pending; see Lab 19 planning record       |
| 26      | 13   | Thu | 11/19 | <b>Lab 20 (TBD)</b>                               | TBD;<br>cumulative reference  | Topic and materials pending; see Lab 20 planning record       |
| 27      | 14   | Tue | 11/24 | No Class                                          | —                             | Fall break                                                    |
| 28      | 14   | Thu | 11/26 | No Class                                          | —                             | Fall break                                                    |
| 29      | 15   | Tue | 12/1  | Practice Test 05; comprehensive final preparation | Cumulative Chs. 1–17, 44–45   | Practice Test 05 covers Modules 1–16; review and make-up work |
| 30      | 15   | Thu | 12/3  | Comprehensive final preparation                   | Cumulative Chs. 1–17, 44–45   | Review and make-up work                                       |
| 31      | 16   | Tue | 12/8  | Comprehensive final review                        | Cumulative Chs. 1–17, 44–45   |                                                               |

| Session | Week | Day | Date  | Topic                               | Recommended textbook chapters | Notes                                                  |
|---------|------|-----|-------|-------------------------------------|-------------------------------|--------------------------------------------------------|
| 32      | 16   | Thu | 12/10 | <b>Comprehensive Final Exam</b>     | Cumulative Chs. 1–17, 44–45   | Final exam                                             |
| 33      | 17   | Tue | 12/15 | Feedback and post-final discussions | —                             | Feedback, course reflection, and post-final discussion |

## Important Dates

- **Section:** C1000, Fall 2026
- **First class meeting:** August 25, 2026
- **Regular meeting pattern:** Tuesdays and Thursdays, 5:30–8:40 PM
- **Location:** D Yard Education room
- **Fall break / no class:** November 24 and 26, 2026
- **Section final examination:** December 10, 2026
- **Feedback and post-final discussions:** December 15, 2026
- **College final-examination period:** December 12–18, 2026
- **No other planned holidays or Pelican Bay program cancellations** are included in this section schedule.

## College Calendar Context

These institutional dates are recorded for planning context; they do not add section cancellations beyond the two fall-break dates above:

- **Fall 2026 calendar anchor:** August 22, 2026 (College classes begin)
- **Labor Day:** September 7, 2026
- **Veterans Day:** November 11, 2026

- **College fall break:** November 23-24, 2026
- **College Thanksgiving holidays:** November 25-27, 2026
- **College classes end:** December 18, 2026

## Exam Schedule

- **Exam 01:** September 17, 2026 - Modules 1-6
- **Exam 02:** October 13, 2026 - Modules 7-11
- **Exam 03:** November 5, 2026 - Modules 12-16
- **Comprehensive Final Exam:** December 10, 2026 - cumulative course assessment
- **Feedback and post-final discussions:** December 15, 2026

## Textbook Reading Map

Recommended text: *Biology*, 14th edition, Sylvia S. Mader and Michael Windelspecht, loose-leaf edition, ISBN **978-1-266-24172-7**. The complete course text is stored in `../resources/textbook/Complete_Combined_Textbook_S2026.pdf`. The chapters in the schedule are recommended readings associated with the meeting's content, not additional graded assignments.

| <b>Module</b> | <b>Textbook chapters</b>                                                             |
|---------------|--------------------------------------------------------------------------------------|
| 01            | Chapter 1: Biology: The Study of Life                                                |
| 02            | Chapter 2: Basic Chemistry                                                           |
| 03            | Chapter 3: The Chemistry of Organic Molecules                                        |
| 04            | Chapter 4: Cell Structure and Function                                               |
| 05            | Chapter 5: Membrane Structure and Function                                           |
| 06            | Chapters 6-8: Metabolism, Photosynthesis, and Cellular Respiration                   |
| 07            | Chapter 12: Molecular Biology of the Gene                                            |
| 08            | Chapters 9-10: Cell Cycle, Cellular Reproduction, and Meiosis                        |
| 09            | Chapter 11: Mendelian Patterns of Inheritance                                        |
| 10            | Chapter 13: Regulation of Gene Expression                                            |
| 11            | Chapter 14: Biotechnology and Genomics                                               |
| 12            | Chapter 15: Darwin and Evolution                                                     |
| 13            | Chapter 16: How Populations Evolve                                                   |
| 14            | Chapters 17 and 19: Speciation, Macroevolution, Taxonomy, Systematics, and Phylogeny |
| 15            | Chapters 44-45: Population Ecology and Community/Ecosystem Ecology                   |
| 16            | Cumulative selected readings from Chapters 1-17 and 44-45                            |
