

Module 8: Cellular Genetics - Learning Questions

1. Why do cells package DNA into chromosomes?
2. What is the purpose of mitosis?
3. What is the purpose of meiosis?
4. How do the products of mitosis and meiosis differ?
5. Why must gametes be haploid?
6. How does crossing over create variation?
7. How does independent assortment create variation?
8. What can happen if chromosomes fail to separate?
9. How does cell division connect to inheritance?
10. What evidence would distinguish mitosis from meiosis?
